

METSIT 21Z 2-Apr The lack of strong pressure gradient will create relatively favorable conditions along the route. Passing and decaying lows in the area will contribute to moderate wave heights, decreasing as the boat approaches the Antarctic Peninsula. A decaying low will advect moisture up the Antarctic Peninsula, causing some snow and fog later in the forecast period.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
