

METSIT 21Z 1-Mar The low pressure system continues down towards the Ross Ice Shelf with the highest winds anticipated today and tonight. Fog blown up the ice shelf may cause some restricted visibility, though little to no snow is anticipated to impact the ship's route. The low will pull away to the east as it decays, leaving the route unaffected by any significant weather tomorrow afternoon.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
