

METSIT 21Z 5-Mar With a relatively stagnant flow present, predominately light winds will affect the boat's last reported position. A weak low will drive overcast conditions and generate snowfall causing periods of restricted visibility due to snow and parital fog throughout the forecast period. Lack of high winds will also help keep wave heights low for the next two days.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
