SURFACE ANALYSIS 5-May-2024 18Z

Seas (FT)

SURFACE FORECAST 7-May-2024 06Z

METSIT 21Z 5-May A developed low near Cape Horn will bring rainfall and fog along the end of the route, keeping winds elevated as the boat approaches the shoreline. As the low moves away and the ship tracks towards its final destination, winds will calm and rain will decrease. Patches of fog will periodically drop visibility along the remainder of the route.

FORECASTER NOTES Ship scheduled to arrive at Punta Arenas tomorrow. This will be my final forecast unless otherwise requested.
