

Ref A: 15 MAR 24 NBP SITREP

Ref B:

METSIT 21Z 18-Mar There is a high pressure region forecasted to sit in the area through out most of the forecast period. This high pressure coupled with abundant moisture is expected to create pockets of dense fog. Expect light winds and low visibility through out most of the period, with a shift coming after 12Z on the 20th as winds pick up.
