

METSIT 06Z 31-Dec Your track is currently between a 1018mb high and a 984mb low to the southwest. The clouds associated with the front has cleared your position, but there is a large cloud bank to the south. The low will shift to the southeast and a new low will develop in its place. Over the next two days, weather over the track will remain consistent, with seas varying from rough to very rough. Winds will peak as gale force tomorrow with light rain from time to time.
