

METSIT 12Z 18-Jan A broad area of weakening low pressure dominates the Ross Sea. Ross Island/McMurdo has experienced a few days of strong winds and heavy snow this week, but that's all tapering off now. Expect lingering cloudiness and occasional light snow as "welcome weather" to port.

FORECASTER NOTES This is my final forecast unless otherwise required. Timely observations received from your ship greatly appreciated. For in-port weather at McMurdo subscribe to the Daily Forecast via an email to usap_ground_weather_support-request@listserv.usap.gov with "Subscription Request" as the subject.
