SURFACE FORECAST

13-Apr-2025

18Z

METSIT 06Z

12-Apr

High pressure continues to dominate the NZ region. Light southwesterly winds will back to the northeast as high pressure to the NE takes centerstage producing fair weather for the last leg of your journey. A cold front will approach the South Island midway through the outlook period, increasing cloudiness and shifting winds to the NW, with a few isolated showers in the area Monday.
